

# PRO-GROW GRO-CONTROL COOLING THERMOSTATS MODELS GC-14, 15, & 16

GC-14

GC-15

GC-16

## GRO-CONTROL COOLING THERMOSTATS

Dependable proven PRO-GROW quality cooling thermostats are ready to use - NO WIRING - just plug in.

These controls provide automatic "ON/OFF" control for cooling equipment such as exhaust fans, coolers, circulation fans, etc.

The control will switch "ON" when the temperature exceeds the dial setting. The control is adjustable through a normal operating range from 40 deg F to 100 deg F. The control turns on with a temperature rise to the dial set point. A decrease in temperature to the set point turns the control "OFF" to stop the cooling/exhaust equipment.

MODEL GC-14 is equipped with a 6 ft. cord with series cap plug that can be plugged into a 120V power source and the cooling equipment can be plugged directly to the cord plug.

MODEL GC-15 has a larger enclosure, a grounded 3 wire cord and receptacle, and a "ON" indicating pilot light.

MODEL GC-16 is the same as GC-15 except it has a "equipment" outlet and second pilot light that is energized when the exhaust outlet is "OFF".

All 3 controls have a 30" capillary with sensing bulb which can be mounted remotely. The controls are built in a heavy gage rugged steel enclosure with Factory Baked enamel finish to withstand the greenhouse environment.

ELECTRICAL RATING @ 120VAC

GC-14 - 8A RES. , 1/6 HP IND.

GC-15 & GC-16 - 12.5A RES, 1/6 HP IND.
