Ind. @ 120 V

Indicating Pilot Lights

Power Switch

MODEL GC-30 - COMBINATION HEATING & COOLING THERMOSTAT CONTROL

*NOW- ONE CONTROL FOR BOTH **HEATING** AND **COOLING***

Dependable proven PRO-GROW quality combination & cooling heating thermostats are ready to use - NO WIRING - just plug the cord into a properly installed grounding outlet and set the control knobs to the desired temperature.

The PRO-GROW combination heating and cooling thermostat control has two thermostats, one to regulate a heater, and one to operate a fan or cooling device. Separate outlets are on the control for direct "plug in" of these devices. Pilot lights indicate which outlets are "on".

Both thermostats have a 30" capillary with sensing bulb which can be mounted remotely.

The controls are built in a heavy gage rugged steel enclosure with Factory Baked enamel finish to withstand the greenhouse environment.
